### Installation Instructions for Eagle Flight™ Brand Valve Stem Extensions With Heavy Duty Brackets

Check to be sure the kit contains the following items:

- 2 Inner wheel valve stem extenders (13" straight)
- 2 Outer wheel valve stem extenders (9" w/90° end)
- 4 Valve stem extender brackets

**1 Note:** Inspect inner and outer wheel valve stems to insure they are at opposing or 180° points. If they are at any other points they should be adjusted.

**Note: (with wheel liners installed if applicable)**

The two jam nuts used for mounting the rear wheel liners on D.O.T. systems should be removed or left off prior to installation because they also serve as the mounting points for the brackets. For under-the-lug style liners or without wheel liners the two lug nuts that align with the valve stems should be left off or removed for use as bracket mounting points.

**2** Attach Inner and outer wheel valve stem extenders and hand tighten. **Fig. 1** (Inner extenders are straight)

**For JAIRL1 and JAIRH1**

**3** Install brackets (largest end toward wheel) on stud extender and tighten jam nuts on D.O.T.-style liners. Install brackets in the same manner on studs and tighten lug nuts on under the lug liners or wheels without liners. Finally install lug nut covers and jam nut covers.

**For JAIRS1**

**3a** Brackets attach under hub cover attachment screws.

**4** Insert valve end of extenders through the top hole of brackets. Securely tighten small nut on extender hoses and install valve cap.

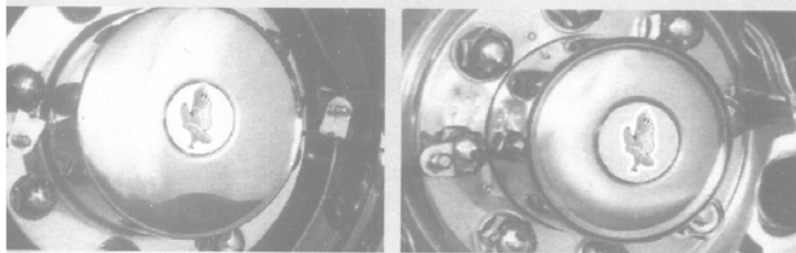

**Care and Maintenance:**

- Ensure valve stem extenders remain tight in brackets; periodically check valve extenders for tightness. **Fig. 1**

# Eagle Flight™

## FOUR HOSE DUAL WHEEL VALVE STEM EXTENSIONS

WITH  
**HEAVY DUTY BRACKETS**

- ✓ Quick & easy installation
- ✓ Rugged braided stainless steel
- ✓ Two pairs extensions with brackets
- ✓ Makes checking air and filling easier

- JAIRL1**-Four hose kit for dual wheels up to 19.5"
- JAIRH1**-Four hose kit for dual wheels 20" through 24.5"
- JAIRS1**-Four hose kit for GM D.O.T.Liner and UniLiner dual wheels
