

EAGLE FLIGHT® STAINLESS STEEL WHEEL SIMULATORS

Type F-S INSTALLATION INSTRUCTIONS

Light Duty Single Wheel Over Lug Mounting with Stud Extenders

Package Contents

- 4 Wheel Simulators
- 8 Stud Extenders
- 8 Attachment Jam Nuts
- 4 Pop Out Centers
- 4 Center Logos
- 1 Installation Tool

Note: This system can be installed with the installation tool provided. No other tools are necessary. Do not use power tools for installation. Eagle Flight® recommends storing the tool with the vehicle's tire tool for future use.

Installation Instructions

1. Do not remove the original equipment lug nuts.
2. Determine correct placement of stud extenders required for proper hand hole and valve stem alignment.
3. Install appropriate stud extender on the portion of the wheel studs that protrudes through the original equipment lug nut on opposing studs.
4. Tighten stud extenders with included installation tool.
5. Install simulator over stud extenders. Now, install the jam nuts on the stud extenders.
6. Check to be sure the wheel cover is centered on the wheel. (Centering of the wheel cover is very important. Failure to center wheel cover may result in throwing the wheel off balance).
7. Use the included tool to tighten jam nuts.
8. Complete the wheel simulator installation by applying hub center decals.
9. Repeat steps 1 through 8 for installation of the other wheel and axle covers.
